Memorandum

MIAMI·DADE COUNTY

DATE: July 14, 2015

TO: Honorable Chairman Jean Monestime
and Members, Board of County Commissioners

FROM: Carlos A. Gimenez
Mayor

SUBJECT: Resolution Authorizing Execution of Interlocal Agreements for Access to the Miami-Dade County Computer-Aided Dispatch System and to Dispatch Emergency and Non-Emergency Calls for Service

Recommendation

It is recommended that the Board of County Commissioners (Board) approve the attached resolution authorizing the County Mayor or County Mayor's designee to execute Interlocal Agreements (Agreements) between Miami-Dade County, through the Miami-Dade Police Department (MDPD) and its law enforcement partner agencies, specifically the North Miami Beach Police Department. The purpose of this Agreement is to provide these law enforcement agencies with access to the Miami-Dade County Computer-Aided Dispatch (CAD) System, and to dispatch the agencies' emergency and non-emergency calls for service. These Agreements will be effective upon signature and will expire on September 30, 2025.

Scope

These Agreements will provide services to law enforcement agencies which may be at the federal, state, regional, tribal, and local level, and specifically the North Miami Beach Police Department.

Delegation of Authority

Upon approval by the Board, the County Mayor or County Mayor's designee is authorized to execute the Agreements and to exercise the provisions contained in the Agreements.

Fiscal Impact/Funding Source

The law enforcement agencies will reimburse Miami-Dade County for all costs associated with providing network connectivity to the CAD, ancillary applications, and associated costs, including re-occurring costs resulting in a cost neutral service.
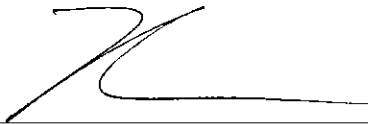

Track Record/Monitor

Reinaldo Valdes, Major of the MDPD Communications Bureau for MDPD will track and monitor these Agreements.

Background

In the conduct of day-to-day operations, both Miami-Dade County and its municipal partners want to provide their citizens with the best possible response to calls for police services. To accomplish this, MDPD operates a CAD System which allows MDPD dispatchers to send information to police units regarding a call for service via mobile data terminals and to announce the call details to field units over a two-way radio system. Several law enforcement agencies wish to have access to the County's CAD System to respond to calls for service from citizens of the municipality as an integral component of the

Emergency 911 System operated by MDPD and supported by the Information Technology Department. This can be accomplished through the installation of necessary network connectivity and ancillary software applications. These law enforcement agencies will reimburse the County for its costs associated with providing these services.

These Agreements will improve response to calls for police services across Miami-Dade County using a single technology solution.

Deputy Mayor
